Education

Ajay Kumar Garg Engineering College

Bachelor of Technology in Computer Science (8.55 CGPA)

Nov. 2022 – Jun 2026

Ghaziabad, Uttar Pradesh

Experience

Kim CC

AI Engineering Intern

Nov. 2025 – Present

Bengaluru, India

- Improved AI response accuracy and workflow coverage from **18% to 60%** by redesigning extraction logic, retrieval workflows, validation layers, and fallback handling.
- Built **webhook ingestion pipelines** integrating **Zoho** and **Gorgias** with the AI platform, enabling automated email-to-AI response workflows for customer support tickets.
- Designed and shipped a **Zoho Desk extension** letting support agents generate, review, and send AI-assisted replies directly inside the helpdesk UI.
- Developed a **graph-based workflow execution engine** for orchestrating multi-step AI pipelines, tool calls, routing logic, and asynchronous task execution.
- Implemented **hybrid product search** using **Qdrant** dense+sparse retrieval for Shopify product discovery, improving retrieval accuracy from **20% to 95%**.
- Built **memory-note infrastructure** with full CRUD support and integrated persistent contextual memory into AI-generated responses for personalized support.
- Built **input/output AI guardrails** to enforce safety constraints, control response behavior, and selectively block automated replies in production.

Daily Wellness AI

AI Engineering Intern

Mar. 2025 – Aug. 2025

Remote, San Diego, CA

- Developed an **AI assessment tool** using **OpenAI SDK** with **Structured Output** to evaluate free-form Q&A and recommend tailored service packages.
- Reduced agent processing latency from **90s to 30s** by introducing **threading** for concurrent tool calls and batching where possible.
- Orchestrated deployment with **FastAPI**, **Docker**, and **AWS EC2**; compressed Docker images from **1 GB to 158 MB** and established **CI/CD**.

GST Magic AI

Freelance AI Engineer

Aug. 2025 – Sep. 2025

Remote

- Engineered a **document management tool** for **GST PDFs** with embedded **metadata**, supporting **search**, **edit**, and **status tracking**; persisted documents to **Pinecone**.
- Deployed a **RAG-based assistant** using the **Pinecone Assistant API** and improved retrieval relevance through metadata augmentation.

Mermory

Freelance AI Engineer

Oct. 2024 – Nov. 2024

Remote, U.S.

- Executed a **generative flashcard pipeline** leveraging **LLaMA 3.1** and **FastAPI** to create cloze deletion and Q&A flashcards.
- Designed an occlusion-based approach using **OpenCV** and **NumPy** to auto-generate labeled diagram study aids.

Projects

Julius AI (AI Interviewer) | *Next.js, Node.js, MongoDB, Redis*

[GitHub](#) | [Demo](#)

- Developed **AI voice agent** conducting **6-stage** conversational interviews followed by **AI-curated coding challenges**, with automated evaluation and hiring recommendations.
- Achieved **800ms** end-to-end latency for real-time voice interviews using **WebSocket-based architecture** with **Deepgram STT** and **ElevenLabs TTS** integration.

Technical Skills

Languages: Python, JavaScript, TypeScript, Go, SQL, HTML, CSS

Technologies/Frameworks: TensorFlow, PyTorch, Scikit-learn, LangChain, Pandas, Next.js, Node.js, FastAPI, Streamlit

Databases: PostgreSQL, MySQL, MongoDB, Redis, Pinecone, FAISS, Qdrant

Tools: Git, Postman, Docker, AWS

Domain Expertise: Machine Learning, Deep Learning, NLP, Retrieval-Augmented Generation, AI Agents

Achievements

Runner-up in an **All-India hackathon (Sparrowthon)** with over **350 participants**.

4th Place in the **Data Analytics Competition** at **NSSC, IIT Kharagpur** among **450+ participants**.
